

This map shows the CMRPC region with the Pictometry grid system. Each sector of the grid represents approximately 1 square mile. All sectors contain 6 community-level geo-referenced oblique images (high altitude flyover) and sectors colored in light blue contain 54 neighborhood-level geo-referenced oblique images (low altitude flyover).

**Community-Level Imagery:**  
 Flown at higher altitude  
 Geo-referenced to a real coordinate system  
 Obliques taken from 2 perpendicular directions at an angle  
 Approximately 6 images per sector

**Neighborhood-Level Imagery:**  
 Flown at lower altitude  
 Geo-referenced to a real coordinate system  
 Obliques taken from 2 perpendicular directions at an angle  
 Approximately 54 images per sector  
 Sectors were selected by MassHighway
